

# Are Chronic Wounds Affecting Your Quality of Life?

## HEAL FASTER WITH ACTIGRAFT

Chronic wounds can be painful, uncomfortable, and difficult to treat. **ActiGraft** is a revolutionary new wound healing solution that promotes the natural wound healing processes of the body. This treatment is **more comfortable**, **more effective**, and **more affordable**.

### What is ActiGraft?

**ActiGraft** is a first-of-its-kind, FDA cleared, wound treatment that uses a patient's own blood to create a blood clot tissue. This blood clot tissue is then applied to the wound, where it promotes the body's own natural healing processes.

During treatment, **ActiGraft** patients reported:

- Significant reduction in pain and improved quality of life
- Reduced risk of infection
- Reduced costs compared to other treatments
- Faster healing with less wound interaction
